RE: Architectural Consulting Group, Inc.

Architectural Consulting Group, Inc. was the MSBA assigned owner's project manager for the MSBA accelerated repair of Wellfleet Elementary School roof. The project involved re-roofing of half of the school roof. The project manager ACG assigned to the project was Donald Velozo.

The project was completed on time and on budget due in part to the attention ACG paid to insuring that other participants (including myself) met their deadlines and produced quality work. The only change orders were change orders initiated by the owner to address minor roofing issues beyond the scope of the project. This project was my first vertical construction project and ACG's assistance proved invaluable. Don was always available, professional in his approach and always prepared. When there were decisions to be made by the owner, Don was always ready with advice on approaches and choices.

I would be pleased to work with Don and ACG again.

Respectfully,

Harry Sarkis Terkanian
Wellfleet Town Administrator
